DETAILED ACTION

Interference

Interference has not been declared in this application since the claims therein have not been found to be allowable.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 33 and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prewett et al. (5,298,254) in view of Lyle (5,061,286).

Prewett et al. disclose a forming a demineralized bone implant containing a biocompatible strength-conserving agent, i.e., a plasticizer. The implant is packaged under sterile conditions for subsequent use. (See col. 1, lines 40-41.) Prewett et al. do not disclose lyophilization of the plasticized bone implant. Lyle discloses an osteoprosthetic implant comprising dimineralized bone powder which is freeze-dried (lyophilized) to provide advantageous sterile conditions and facilitate storage of the implant for subsequent use (see col. 3, lines 36-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to lyophilize the plasticized bone implant of Prewett et al., in view of Lyle, in order to provide advantageous sterile conditions and facilitate storage of the implant for subsequent use.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
